

CODE FOR SUSTAINABLE HOMES CALCULATOR

LABC New Home Warranty is proud to announce that we will shortly be launching our Code for Sustainable Homes Calculator. This application will be accessible via www.labcnhw.co.uk and free to use and we predict that it will revolutionise the Code for Sustainable Homes customer experience!

The 'Code Calculator' is a unique online application designed with our clients in mind. It allows clients to work in a live environment and try out different permutations/solutions for meeting their desired code rating, and find the most cost effective or suitable method of compliance dependent on their own unique circumstances. Not only will this application speed up the Code for Sustainable Homes assessment process once an order has been placed, it will also act as a source of information and guidance for our clients.

Our biggest commitment to our clients is to continually improve our service and enhance the customer experience, while keeping our costs as competitive as possible.

For more information on the Code Calculator or our Code for Sustainable Homes assessments contact **0845 054 0505**.
